

Open Street Map online

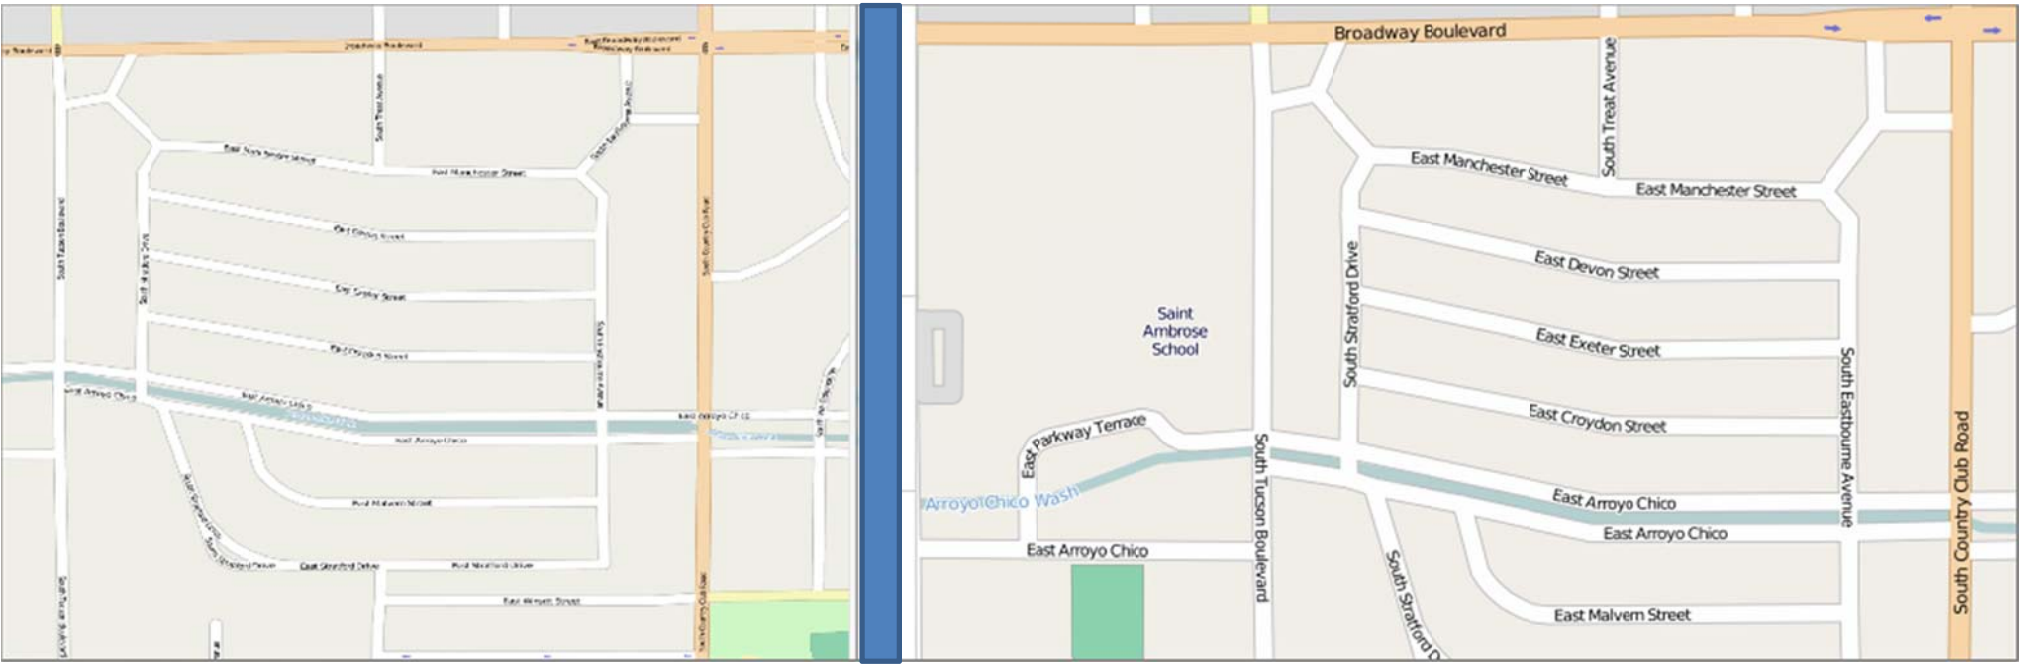

Open Street Map in Topofusion I couldn't get the exact zoom level, so there are two shown for comparison.

Zooming in farther.

Same area in TopoFusion and OpenStreetMaps side by side, approximate same zoom.
Street names are much harder to read in TopoFusion showing OSM (left) than in OpenStreetMap (right)

Continued on next page

Increasing the zoom so it's greater than the web version helps a little, but it's still harder to read the street names.
